Professional Summary

Full-Stack Developer with 9 months of hands-on experience building scalable web applications using the MERN stack. Experienced in developing responsive frontends, secure backend APIs, and real-time features using React.js, TypeScript, Node.js, Express.js, and MongoDB.

Built and deployed production-ready projects with authentication, state management, API integration, and performance optimization. Strong understanding of data structures, RESTful APIs, component-driven architecture, and modern frontend engineering practices.

Education

Madhav Institute of Technology and Science, Gwalior

Nov 2022-May 2026

Computer Science and Engineering

- GPA: 8+
- **Coursework:** Data Structures & Algorithms, Operating Systems, DBMS, Distributed Systems, Computer Networks, OOP, Web Development.

Experience

Educerns Technologies Pvt. Ltd., Gwalior

Aug 2025-May 2026

Front-End Developer Intern

- Developed responsive and reusable UI components using React.js, TypeScript, Tailwind CSS, HTML5, and CSS3.
- Collaborated with backend developers and designers to deliver production-ready frontend features and seamless user experiences.
- Improved application performance and accessibility by optimizing component rendering and reducing page load time.
- Worked with Git-based workflows, code reviews, and Agile sprint cycles in a collaborative development environment.
- Integrated REST APIs and handled asynchronous state updates for dynamic frontend functionality.

Projects

Dev-Tinder – Full-Stack MERN Chat & Networking Platform

[Frontend](#) | [Backend](#)

- Developed a full-stack networking platform with real-time chat functionality using Socket.IO and the MERN stack.
- Built secure authentication and authorization flows using JWT, protected routes, cookies, and middleware validation.
- Designed scalable RESTful APIs using Express.js and MongoDB following MVC architecture principles.
- Implemented global state management using Redux Toolkit to reduce redundant API calls and improve application performance.
- Integrated Cloudinary for media uploads and optimized frontend responsiveness using Tailwind CSS and reusable React components.

Config-Driven UI Food Ordering App

[github.com/repo](#)

- Built a responsive food-ordering application using React.js with reusable config-driven UI components.
- Integrated Firebase Authentication and real-time database services for dynamic data handling.
- Implemented routing, state management, and optimized component rendering for improved user experience and faster load times.

Portfolio Website

[my-portfolio](#) 

- Developed a responsive portfolio website using React.js and Tailwind CSS with reusable component architecture.
- Implemented smooth UI interactions, mobile-first responsiveness, and optimized frontend performance.
- Deployed the application on Vercel with continuous deployment integration.

Technical Skills

Languages: JavaScript, TypeScript, C++, Python, HTML5, CSS3

Frontend: React.js, TypeScript, Redux Toolkit, Tailwind CSS, ShadCN UI, Daisy UI

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware, MVC Architecture

Databases & Cloud: MongoDB, Firebase, Cloudinary

Tools & Technologies: Git, GitHub, Postman, Axios, Socket.IO, Vercel

Core CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
